EDUCATION

Nanyang Technological University, Singapore

Aug 2019 – May 2023

Bachelor of Engineering (Computer Science), Honours (Distinction)

- CGPA: 4.15/5.00
- Elective Focus in Artificial Intelligence & Data Science and Analytics, Minor in Modern Languages (Korean)

Ewha International Summer College

Jun 2022 – Jul 2022

Student Summer Exchange Programme

- Engaged in in-depth discussions on the applications of Artificial Intelligence during interactive classroom sessions, expanding knowledge and understanding of the field

WORK EXPERIENCE

HP Inc.

Jul 2023 – Present

Software Development Engineer (Manufacturing Test)

- Automated manufacturing test processes using VB.NET and C#, enabling structured data collection and analysis of production metrics such as yield, defect rates, and process capability (Cp/Cpk), reducing manual effort by 70% and improving test cycle time by 70%.
- Led test readiness, system validation, and factory transitions across 3+ manufacturing sites, enabling 100% on-time production ramp-up with zero critical test failures in the P11 project.
- Analyzed production and test data to identify root causes of defects, driving cross-functional resolution that reduced failure rates from 42% to 1.5%.
- Supported monthly financial reporting by consolidating data from 5+ business units into Excel, preparing reports and presentation materials to support management review and data-driven discussions.

Pixium Digital Pte Ltd

Aug 2022 – Nov 2022

Software Developer UI/UX Part Time Intern

- Delivered responsive front-end components using HTML and CSS, improving usability and visual consistency across projects.
- Designed high-quality wireframes and interactive prototypes to support tender submissions, enhancing clarity of product vision and client engagement.

Pixium Digital Pte Ltd

Dec 2021 – May 2022

Software Developer UI/UX Intern

- Developed and maintained web applications using Yii2 and React, contributing to scalable and maintainable solutions.
- Enhanced existing products by refining wireframes and UI/UX flows, improving overall user experience.
- Played a key role in winning client tenders by creating compelling wireframes and prototypes that effectively communicated design intent.
- Performed UI/UX audits on existing applications, identifying usability gaps and recommending design improvements.

TES – Sustainable Technology Solutions

May 2021 – Aug 2021

Summer Analyst and Developer Intern

- Planned and developed Power BI dashboards for over 40 facilities worldwide
- Utilized Amazon Web Service (AWS) for improvement of data preparation and data extraction
- Designed wireframes and prototypes for an in-house upcoming ERP system

ACADEMIC PROJECT

Nanyang Technological University, Singapore

Aug 2022 – May 2023

Final Year Project - Person-Centered Care (PEAR) for Dementia Patients (Front-end System Development)

- Developed front-end features for the dementia care system, emphasizing user experience enhancement, data validation, and API integration
- Migrated the PEAR system from Android Studio to React Native Expo, enabling efficient cross-platform development
- Redesigned and developed the user interface of the Add Patient feature using JavaScript, prioritizing intuitive design principles for enhanced usability

SKILLS

- Python, MySQL, Power BI, C#, VB.NET, JavaScript, HTML/CSS, React, React Native, Hardware Test Automation, Data Analysis, UI/UX Design, Wireframing & Prototyping, Git
